## PIPE FITTINGS FOR CONCENTRIC PIPE INSTALLATIONS

Concentric Seal Cross

Concentric Ball Elbow

MONITOR® CONCENTRIC SEAL CROSS, and BALL ELBOW are special pipe fittings for concentric pipe installations. The Seal Cross is used to terminate the concentric piping at a point near the pump and also has two tappings, which eliminate from the piping at least one large T fitting. The Ball Elbow is used to raise the concentric pipe terminal to a specific elevation above the basement floor.

### Concentric Seal Cross

Order No.	Wt.	Pressure Pipe	Pressure Tap	Suction Pipe Sealed
211CSC	4	2"	1"	1"
2112CSC	5	2"	1-1/4"	1-1/4"

### Concentric Ball Elbow

Ord. No.	Wt.	Pressure Pipe	Suction Pipe	
			Max. I.D.	Extra Length
2117CBE	6	2"	1"	1-3/4"
